## Case Studies:

1. **Case Study 1: Respiratory Infections**  
A 45-year-old male patient with a long history of smoking presents with a persistent cough and shortness of breath. The patient reports a recent episode of influenza. The physician suspects a secondary bacterial infection.

**Donahoe, M.D., Donahoe, C.H.** — J. W. J.  
The patient's symptoms are consistent with a bacterial infection.

**Empiric Antibiotics in In-** — **Painful**  
The patient's symptoms are consistent with a bacterial infection.
