

February 20, 2015

Dear ACP Member,

There has been a lot of discussion in the internal medicine community about the ABIM Maintenance of Certification (MOC) program since ABIM's recent email on February 3 apologizing about problems with the program and outlining a series of planned changes and commitments for improvement. In the email I subsequently sent to ACP members on February 4, I complimented ABIM's President, Dr. Richard Baron, for both the tone and content of his email. I also expressed our satisfaction in knowing that ACP was the leader in speaking for the broad internal medicine community to advocate for reform. I reflected upon how our approach for providing a strong message as well as constructive input to ABIM was successful.
