Making an Informed Decision

Questions You Should Ask About the Research Study

- 1. What is the purpose of the study?
- 2. Who conducted the study?
- 3. How was the study conducted?
- 4. What were the results of the study?
- 5. How long did the study last?
- 6. How many people were involved in the study?
- 7. What were the limitations of the study?
- 8. How reliable are the results of the study?
- 9. How valid are the results of the study?
- 10. How can the results of the study be applied to practice?

Questions You Should Also Ask When Your Doctor is Doing the Research

- 1. How long has your doctor been practicing?
- 2. What is your doctor's education and training?
- 3. How long has your doctor been working at this hospital/clinic?
- 4. How many patients does your doctor see each day?
- 5. How long has your doctor been working in this specialty?
- 6. How many years of experience does your doctor have in this specialty?
- 7. How many patients does your doctor see each day in this specialty?
- 8. How long has your doctor been working in this specialty?
- 9. How many years of experience does your doctor have in this specialty?
- 10. How many patients does your doctor see each day in this specialty?
